

# AFS Energy Solutions Program for Corporate Members

A Comprehensive Solution Managing Supply

*Electric supply for induction furnaces*

## **ELECTRICITY SUPPLY - Procurement Assistance**

The AFS Energy Solutions Program was created to provide expert assistance to help AFS Corporate Members navigate the complex world of electric procurement and to represent **your** best interests. As with most foundries, electricity is probably one of your highest costs, and that cost is steadily increasing. Your facilities may, or may not, be located in an area where you can shop for the best deal for your electric supply requirements. As a complimentary service, we will inform you of your options—no matter where you are located.

Many foundries have no choice in electric suppliers. Some make the mistake of assuming that, they have few, if any, alternatives for their energy costs. This is an expensive error. The reality is that most companies have a choice of the energy programs and tariffs they are enrolled in. We review (at no charge) the cost structure for ANY company—throughout the Continental US. Even if you must get energy from your local utilities, you may still have options to save you money you are not aware of.

## **What We Can Do For You:**

We help you research, compare and obtain bids from a variety of suppliers. Using an online reverse auction, we provide a unique and highly competitive environment to find the best procurement options for your needs. There is no cost to run the reverse auction and there is no obligation. If you choose to move forward, you pick the supplier, rate and contract terms you prefer.

We combine this revolutionary technology with expert energy consultants who work with you one-on-one throughout the process to:

- Assess your energy needs
- Share strategies and insights
- Answer your questions
- Estimate your potential savings
- Act as your personal consultant every step of the way, including during your live reverse auction

**Explore opportunities to maximize your savings, ensure reliable service and benefit from predictable costs for this essential commodity.**

**Risk-free assessment of your options.**
